

Call for Papers

**American Institute of
Chemical Engineers
2010 AIChE Annual Meeting
November 7-12, 2010
Salt Lake City, UT**

Innovations in Information Technology

Wikipedia states that Information Technology is "...the study, design, development, implementation, support or management of computer-based information systems, particularly software applications and computer hardware."

This session provides a forum for interactive demos of innovative applications of information technology to problems in chemical engineering, plant operation, knowledge management and knowledge discovery.

Do you have an innovative approach in using information technology to investigate or solve chemical engineering problems? If so, consider sharing it with others who have a similar appreciation of using step-out technologies by submitting an abstract for session 10E3 Innovations in Information Technology.

Questions regarding submitting abstracts
