

Post-Doctoral Position in Control/Optimization

Swiss Federal Institute of Technology in Lausanne (EPFL)

The Laboratoire d'Automatique of the Swiss Federal Institute of Technology in Lausanne (EPFL) invites applications for a post-doctoral or senior research position in the area of

Real-time Optimization

We are looking for an outstanding candidate with a PhD degree in control or optimization who can supervise graduate students and interact with industry. Since the expected length of stay at the EPFL is in the order of 4 years, the position is ideally suited for a young scientist interested in building up the broad and comprehensive research record necessary for a subsequent career move. The duties will include the following elements:

- Research in the area of on-line optimization
- Supervision of doctoral students
- Interaction with industrial partners
- Teaching at the doctoral level

The Laboratoire d'Automatique is a multidisciplinary teaching and research unit that includes three professors, a senior lecturer, 4 research associates, about 20 doctoral candidates as well as supporting staff.

Lausanne is a mid-sized, French-speaking city nicely located on the northern shore of Lake Geneva. It offers a large variety of cultural and recreational activities.

The position is available starting as early as Fall 2012. A highly competitive salary is offered. The application material should include:

- Curriculum vitae with a list of publications and the name of three professional references with phone, postal and e-mail addresses.
- A short description of experiences and future professional objectives.
